

Software directly linked to Automatic-Logistic solutions

To go along with our robot, automat, combined robot-automat and sorter solutions, we use many components and software. Intuitive and effective, the software has been developed to match your specific needs and expectations. Here is an overview :

Software	Software utility	ROBOT	AUTOMAT	COMBINED	SORTER
MEKASOFT	provides a daily comprehensive management of the Automat and the robot (edition restocking, indication of minimum stocks, Stock management and helps inventory, help to create new references) and the exchange of information between APOTEKA and CD API is even faster for accelerated validation of daily orders	X	X	X	X
SMARTDRIVE	Conveying control: increase work speed for several orders, the current one triggers the next when the critical point is reached significant energy savings	X	X	X	N.A
CD API	(information system between robot and external devices through the standard named CD API): stock management software	X	X	X	X
Optimum Analysis	audit service and advice on the evolution of rotations	Automatic	X	X	N.A
Telemetry by Laser	physical automatic counting for a perfect and permanent knowledge of the stock	X	N.A	X	N.A
Reading data matrix code	Permet une traçabilité grâce à l'identification de chaque produit Provides traceability through identification of each product	X	X	X	X
E com	software dedicated to the collection and analysis of the technical data of each installed solution. It automatically diagnoses most malfunctions and is even able to also fix it automatically!	X	X	X	X
